

Chakka Vijay Chandra

AI/ML Engineer | +91 9493780268 | chakkavijay415@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI/ML Engineer specializing in LLM applications, multi-agent workflows (LangGraph), and enterprise RAG architecture. Currently a **Go-To-Market AI Engineer Intern at Guidewire Software**, building Salesforce-integrated AI agents and automated retrieval systems. Proven track record in developing production-grade Agentic AI Agents, vector search, and cloud-native AI deployments across AWS.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, PyTorch(torch.compile, Custom Autograd), CUDA (Basic)

Backend Engineering: FastAPI, Node.js, PostgreSQL, MongoDB, RESTful APIs, gRPC.

Frontend Engineering: React.js, TypeScript, Next.js, JavaScript, WebSocket/SSE Stream Handling, State Management

Distributed Training & Scaling: FSDP (Fully Sharded Data Parallel), DeepSpeed, Ray Core, Slurm Cluster Management

Performance Inference: vLLM, TensorRT-LLM, Triton Inference Server, Model Quantization (AWQ, GPTQ, bitsandbytes)

Core AI: Transformer Architectures, Mixture-of-Experts (MoE), Parameter-Efficient Fine-Tuning (LoRA, QLoRA)

Reinforcement Learning: RLHF, Direct Preference Optimization, Proximal Policy Optimization, Reward Model Training

Agentic AI & Orchestration: Custom Stateful Multi-Agent, LangGraph, Advanced Human-in-the-Loop (HITL) Workflows

Advanced RAG & Knowledge Systems: GraphRAG, Hybrid Vector/Lexical Search, Cohere/BGE Reranking, Neo4j Knowledge Graphs, FAISS.

AI Evaluation & Security: Mechanistic Interpretability, Adversarial Red Teaming, Custom Evaluation Harnesses, Benchmarking (SWE-bench, GPQA, MMLU-Pro), Ragas

Enterprise Platforms: Salesforce, Revenue Cloud, Lightning Web Components (LWC), SOQL, Sales cloud, service cloud.

Data & ML Engineering: Petabyte-Scale ETL, MLflow

Cloud & Infrastructure: AWS (SageMaker, Bedrock, EC2), Azure (AKS, Azure ML), GCP (GKE, Vertex AI, BigQuery)

DevOps & MLOps Orchestration: Docker, Kubernetes, CI/CD, Triton-based Model Deployment.

PROFESSIONAL EXPERIENCE

Guidewire Software | Bengaluru, India | **Go-To-Market AI Engineer Intern** | June 2026 - Present

- Designed and developed enterprise Agentic AI workflows using LangGraph and LangChain, implementing stateful multi-agent orchestration, Human-in-the-Loop (HITL) workflows, and Retrieval-Augmented Generation (RAG) to automate Go-To-Market business processes.
- Built Salesforce-integrated AI agents by developing prompt-engineered workflows, structured outputs with Pydantic, and intelligent tool-calling pipelines, improving workflow reliability while reducing hallucinations across enterprise AI applications.
- Collaborated with cross-functional engineering teams to develop, test, and optimize production-ready AI solutions, executing UAT, resolving workflow defects, and enhancing enterprise automation through scalable AI-driven architectures.

Suthra Technologies | Vijayawada, India | **Associate AI/ML Engineer** | Jul 2025 - Jun 2026

- Built an invoice automation workflow it handles document classification and metadata extraction using Python, langchain, LangGraph cutting manual processing time considerably.
- Developed an AI-powered email outreach,campaign management analytics and rate-limiting to keep things reliable at scale.
- Maintaining data built on Delta Lake and OCR integrations, with all deployments running through CI/CD on in aws DevOps.

SkillDzire (AICTE) | Remote | **Artificial Intelligence Intern** | Nov 2024 - Feb 2025

- Designed a sentiment analysis engine that hit 73% accuracy, built on advanced NLP - outputs fed directly into product planning and helped drive three new features onto the roadmap.
- Processed large volumes of user feedback text to surface trends in public sentiment, providing the team with a reliable, data-backed view of product reception.

PROJECTS

AI Resume Analyzer – Agentic RAG - Python | LangChain | FAISS | Ollama | Streamlit | GPT-4o

- Developed an Agentic RAG system that analyzes resumes against job descriptions using semantic search, automated skill matching, and LLM-based reasoning.
- Built an end-to-end retrieval pipeline with PDF ingestion, document chunking, embeddings, FAISS vector search, and local LLM inference using Ollama with optional GPT-4o integration.
- Generated structured evaluation reports including resume score, matched skills, missing competencies, and personalized improvement recommendations.

AI Identity Verification System - Python | LangChain | GPT-4o Vision | Streamlit

- Built an AI-powered identity verification application using GPT-4o Vision to extract and validate information from government-issued identity documents.
- Developed an automated verification workflow to compare extracted identity information with user-provided data for intelligent KYC verification.
- Designed an interactive Streamlit application integrating LangChain workflows for document processing and verification.

Multimodal Agentic Reasoning - Python | LangGraph | GPT-4o Vision | Agentic AI

- Developed a multimodal AI agent capable of reasoning over text and images through dynamic tool selection and multi-step agent workflows.
- Implemented agent orchestration to combine visual understanding with contextual reasoning for complex user queries.
- Built modular workflows to improve extensibility and support future multi-agent capabilities.

AI-Powered Financial Advisor for Rural India - Python | React | TypeScript | Node.js | GCP

- Developed an AI-enabled financial advisory platform providing budgeting, financial literacy, goal tracking, and personalized guidance.
- Built modular backend services and responsive frontend components to deliver AI-assisted financial recommendations.

GenAI Marketing Suite - Python | LangChain | Streamlit

- Built a Generative AI platform workflow for multiple automated blog generation, marketing emails, and speech creation using LangChain.
- Implemented structured prompt workflows to generate outlines before producing long-form content.

EDUCATION

- **B.Tech in Information Technology**

Prasad V. Potluri Siddhartha Institute of Technology (JNTUK) - Vijayawada, India | Aug 2021 - Mar 2025

- **Class XII - Board of Intermediate Education Andhra Pradesh**

Sri Chaitanya Junior College | Jun 2019 - May 2021

- **Class X - Board of Secondary Education, Telangana**

Sri Chaitanya School | Mar 2019

LEADERSHIP & COMMUNITY

Campus Lead - Microsoft Learn Student Ambassador (MLSA) | Jan 2024 - Jul 2025

- Led the MLSA chapter at PVPSIT - managed 12 technical teams across AI/ML, Cloud, DevOps, Web Dev, and more; led a core team of 40+ members and mentored 86+ active contributors.
- Executed workshops on Azure AI, Git/GitHub grew the campus tech community by 40%.
- Collaborated with Microsoft Principal Eng leads to deliver AI automation challenges and hands-on cloud labs.

Core Team Member - Google Developer Student Club (GDSC) | Aug 2023 - Aug 2024

- Co-led the university's biggest annual tech fest, coordinating 10+ interdepartmental events; managed Android Study Jams training 100+ students.

CERTIFICATIONS

- Azure AI Engineer Associate (Microsoft)
- Google Cloud Computing Foundations
- AWS Academy Graduate (Data Engineering & Cloud)
- Salesforce Certified AI Associate
- Generative AI for Everyone (DeepLearning.AI)
- Cybersecurity Fundamentals (IBM)
- SQL, Java, CSS (HackerRank)

RESEARCH & PUBLICATIONS

- A Text-Based Conversational Agent for Asthma Support - [IJIRT \(Paper ID: JETNR_230725\)](#)
- Attendance Management System with Email Notifications - [IJIRT \(Paper ID: 276804\)](#)

ACHIEVEMENTS

- 2025 - Secured 1st place National Fest Hackathon (paper presentation); 2nd prize, UR FEST 2025 poster presentation.
- 2024 - Awarded 1st place among 233 teams, UXTIVITY (UNIX) Website Interface Challenge at Affosec National Techno-Cultural Fest.
- 2023 - Claimed 1st prize among 120 teams, Hack-a-bot (UiPath): built a bot to remove redundancy in student admission records.
