

Chakka Vijay Chandra

Associate AI/ML Engineer | Vijayawada, AP | +91 9493780268 | chakkavijay415@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Associate AI/ML Engineer with practical experience working on machine learning projects focused on document processing and NLP workflows. Currently involved in supporting ML pipelines, data preprocessing, and API-based model integration. Work closely with senior engineers on deployment and basic MLOps tasks in cloud environments.

Core Technical Skills

- **AI & ML:** NLP fundamentals (tokenization, embeddings, attention), transformer-based document classification, metadata extraction, langchain
- **Data Processing:** Python, Apache Spark, Azure Databricks, ETL pipelines, Delta Lake.
- **MLOps & APIs:** FastAPI, CI/CD pipelines, MLflow (basic usage), model deployment.
- **Databases:** MongoDB, PostgreSQL, vector search (FAISS, Chroma DB).
- **DevOps:** Docker, Kubernetes, Git.
- **LLMs & NLP Systems:** GPT, LLaMA, BERT, T5, RAG.
- **Model Optimization:** ONNX, quantization.
- **Cloud:** (Vertex AI, GKE, BigQuery), Azure (ML Studio, AKS, Cognitive Services), AWS (SageMaker, Lambda, EC2 g5), IAM, Autoscaling.
- **Programming Languages:** Python, C, C++.
- **Frontend:** React.js, HTML5, CSS3, JavaScript, TypeScript.
- **Backend:** Node.js, REST APIs.

Professional Experience

Suthra Technologies | Vijayawada, AP Associate AI/ML Engineer | Jul 2025 -Present

- Supporting the development of AI workflows for document classification and metadata extraction as part of an existing ML pipeline.
- Utilized Python, Spark, and Azure Databricks and aws bedrock to enhance data processing efficiency.
- Contributing to scalable data pipelines using Delta Lake and OCR tools, improving data accuracy.

Artificial Intelligence Internship -SkillDzire (AICTE) Nov 2024 -Feb 2025

- Engineered a predictive sentiment analysis engine with 73% accuracy, providing actionable insights that led to the prioritization of 3 new features in the product roadmap.
- Developed and implemented a sophisticated sentiment analysis engine utilizing advanced NLP, processing vast textual data and extracting nuanced emotional tones with 75% consistent accuracy.
- Analytical insights served as a critical data-driven foundation for strategic decision-making and future product enhancements.

Advanced Data Analytics Intern -EY (Edu net) (AICTE) Feb 2024 -Apr 2025

- Utilized data analytics and SQL to generate insights and data-driven recommendations for clients.
- Designed interactive dashboards in Power BI and Tableau.
- Automated data pipelines for real-time data visualization and reporting.

AWS Data Engineering Virtual Internship -AWS (Remote) (AICTE) Apr 2024 -Jun 2024

- Designed and developed data pipelines to facilitate smooth data flow; implemented ETL processes.
- Utilized AWS services for data storage, processing, and analysis integrating data from various sources.

Projects

AI-Powered Research Paper Summarizer & Knowledge Graph Generator

- Built an intelligent research assistant using a RAG pipeline with LangChain, Azure OpenAI, and Azure AI Search to analyse and summarize research papers automatically.
- Integrated a Neo4j knowledge graph to visualize conceptual relationships, improving research discovery speed by 60%.

- Configured deployment workflows on Azure ML Studio with CI/CD integration through Azure DevOps.

AI-Powered Financial Advisor for Rural India

- Developed a full-stack financial empowerment platform using Python, GCP, and MERN stack.
- Delivers AI-driven budgeting tools and financial education in local languages to improve financial inclusion.

YouTube Sentiment Analysis (Machine Learning, Python)

- Built a YouTube Sentiment Analysis web app using Streamlit, VADER, and the YouTube Data API to extract video comments.
- Analysed sentiment (positive, negative, neutral) and visualized results with bar charts and scatter plots.
- Implemented automated retrieval of video & channel details; stored comments in CSV files for further analysis.

Education

B.Tech in Information Technology

Prasad V. Potluri Siddhartha Institute of Technology (JNTUK), Vijayawada | Aug 2021 -Mar 2025

Class XII - BIEAP

Sri Chaitanya Junior College | Jun 2019 -May 2021

Class X - Telangana State Board

Sri Chaitanya School | Mar 2019

Research & Publications

- A Text-Based Conversational Agent for Asthma Support, JETNR - Paper ID: JETNR_230725
- Attendance Management System with E-mail Notifications, IJCRT - Paper ID: 276804

Achievements

- 2025 - Won 1st prize in the National Fest Hackathon for paper presentation; secured 2nd prize in poster presentation at UR FEST 2025.
- 2024 - 1st prize / 233 participants in UXTIVITY (UNIX) Challenge Interface of Website at Affosec National Level Techno-Cultural Fest.
- 2023 - 1st position / 120 participants in Hack-a-bot (UiPath): developed a bot to remove redundancy in student admission records and delete specific mobile numbers from files.

Certifications

- Azure AI Engineer Associate - Microsoft Certified
- AI for Everyone - DeepLearning.AI / Coursera
- Generative AI for Everyone - DeepLearning.AI / Coursera
- Google Cloud Computing Foundations - Google Certified
- Salesforce Certified AI Associate - Trailblazer
- AWS Academy Graduate (Data Engineering, Cloud Foundations)
- Cybersecurity Fundamentals - IBM
- SQL, Java, CSS - HackerRank Certified
- Spoken Tutorial Project C Training - IIT Bombay
- Introduction to User Experience Design - Georgia Institute of Technology / Coursera

Leadership & Community Impact

Campus Lead - Microsoft Learn Student Ambassador (MLSA) Jan 2024 -Jul 2025

- Led the MLSA PVPSIT Chapter, managing 12 specialized technical teams across AI & ML, Data Science, Cloud, Cybersecurity, Web Development, Flutter & Android, DevOps, UI/UX, Quantum Computing, Organizing, and Social Media.
- Led a core team of 40+ members and mentored 50+ active student contributors through structured learning tracks, projects, and community sessions.
- Conducted 3+ workshops on Azure AI, Git & GitHub, LangChain, OpenAI APIs, Cloud Fundamentals, and Generative AI applications.

- Grew the campus tech community by 40% by building an interdisciplinary developer ecosystem promoting collaboration across AI, Web, and Cloud domains.
- Partnered with Microsoft mentors (Principal Software Eng Lead at Microsoft) to drive real-world learning through AI automation challenges and hands-on cloud labs.
- Recognized as a top-performing campus lead for fostering peer mentorship and bridging academic learning with industry-ready technologies.

Core Team Member - Google Developer Student Club (GDSC) Aug 2023 -Aug 2024

- Co-led the university's **largest annual tech fest**, coordinating 10+ interdepartmental events.
- Managed the **Android Study Jams program**, training 100+ students in app development.
- Initiated community-driven sessions on Web, AI, and Cloud technologies to boost practical skills.

Volunteer Tutor for High School Students May 2023 -May 2024

- Tutored Chemistry (NIT level) for 9th–10th grade students at Vijnana Vihara School, Enikepadu, Vijayawada.
- Helped improve academic performance and inspired STEM interest among young learners.
- Developed structured teaching modules and mock tests for advanced concept clarity.
